Legal Operations and Technology:

What's in it for me?

Doing less work &/or doing more important things ...

Why should you care?

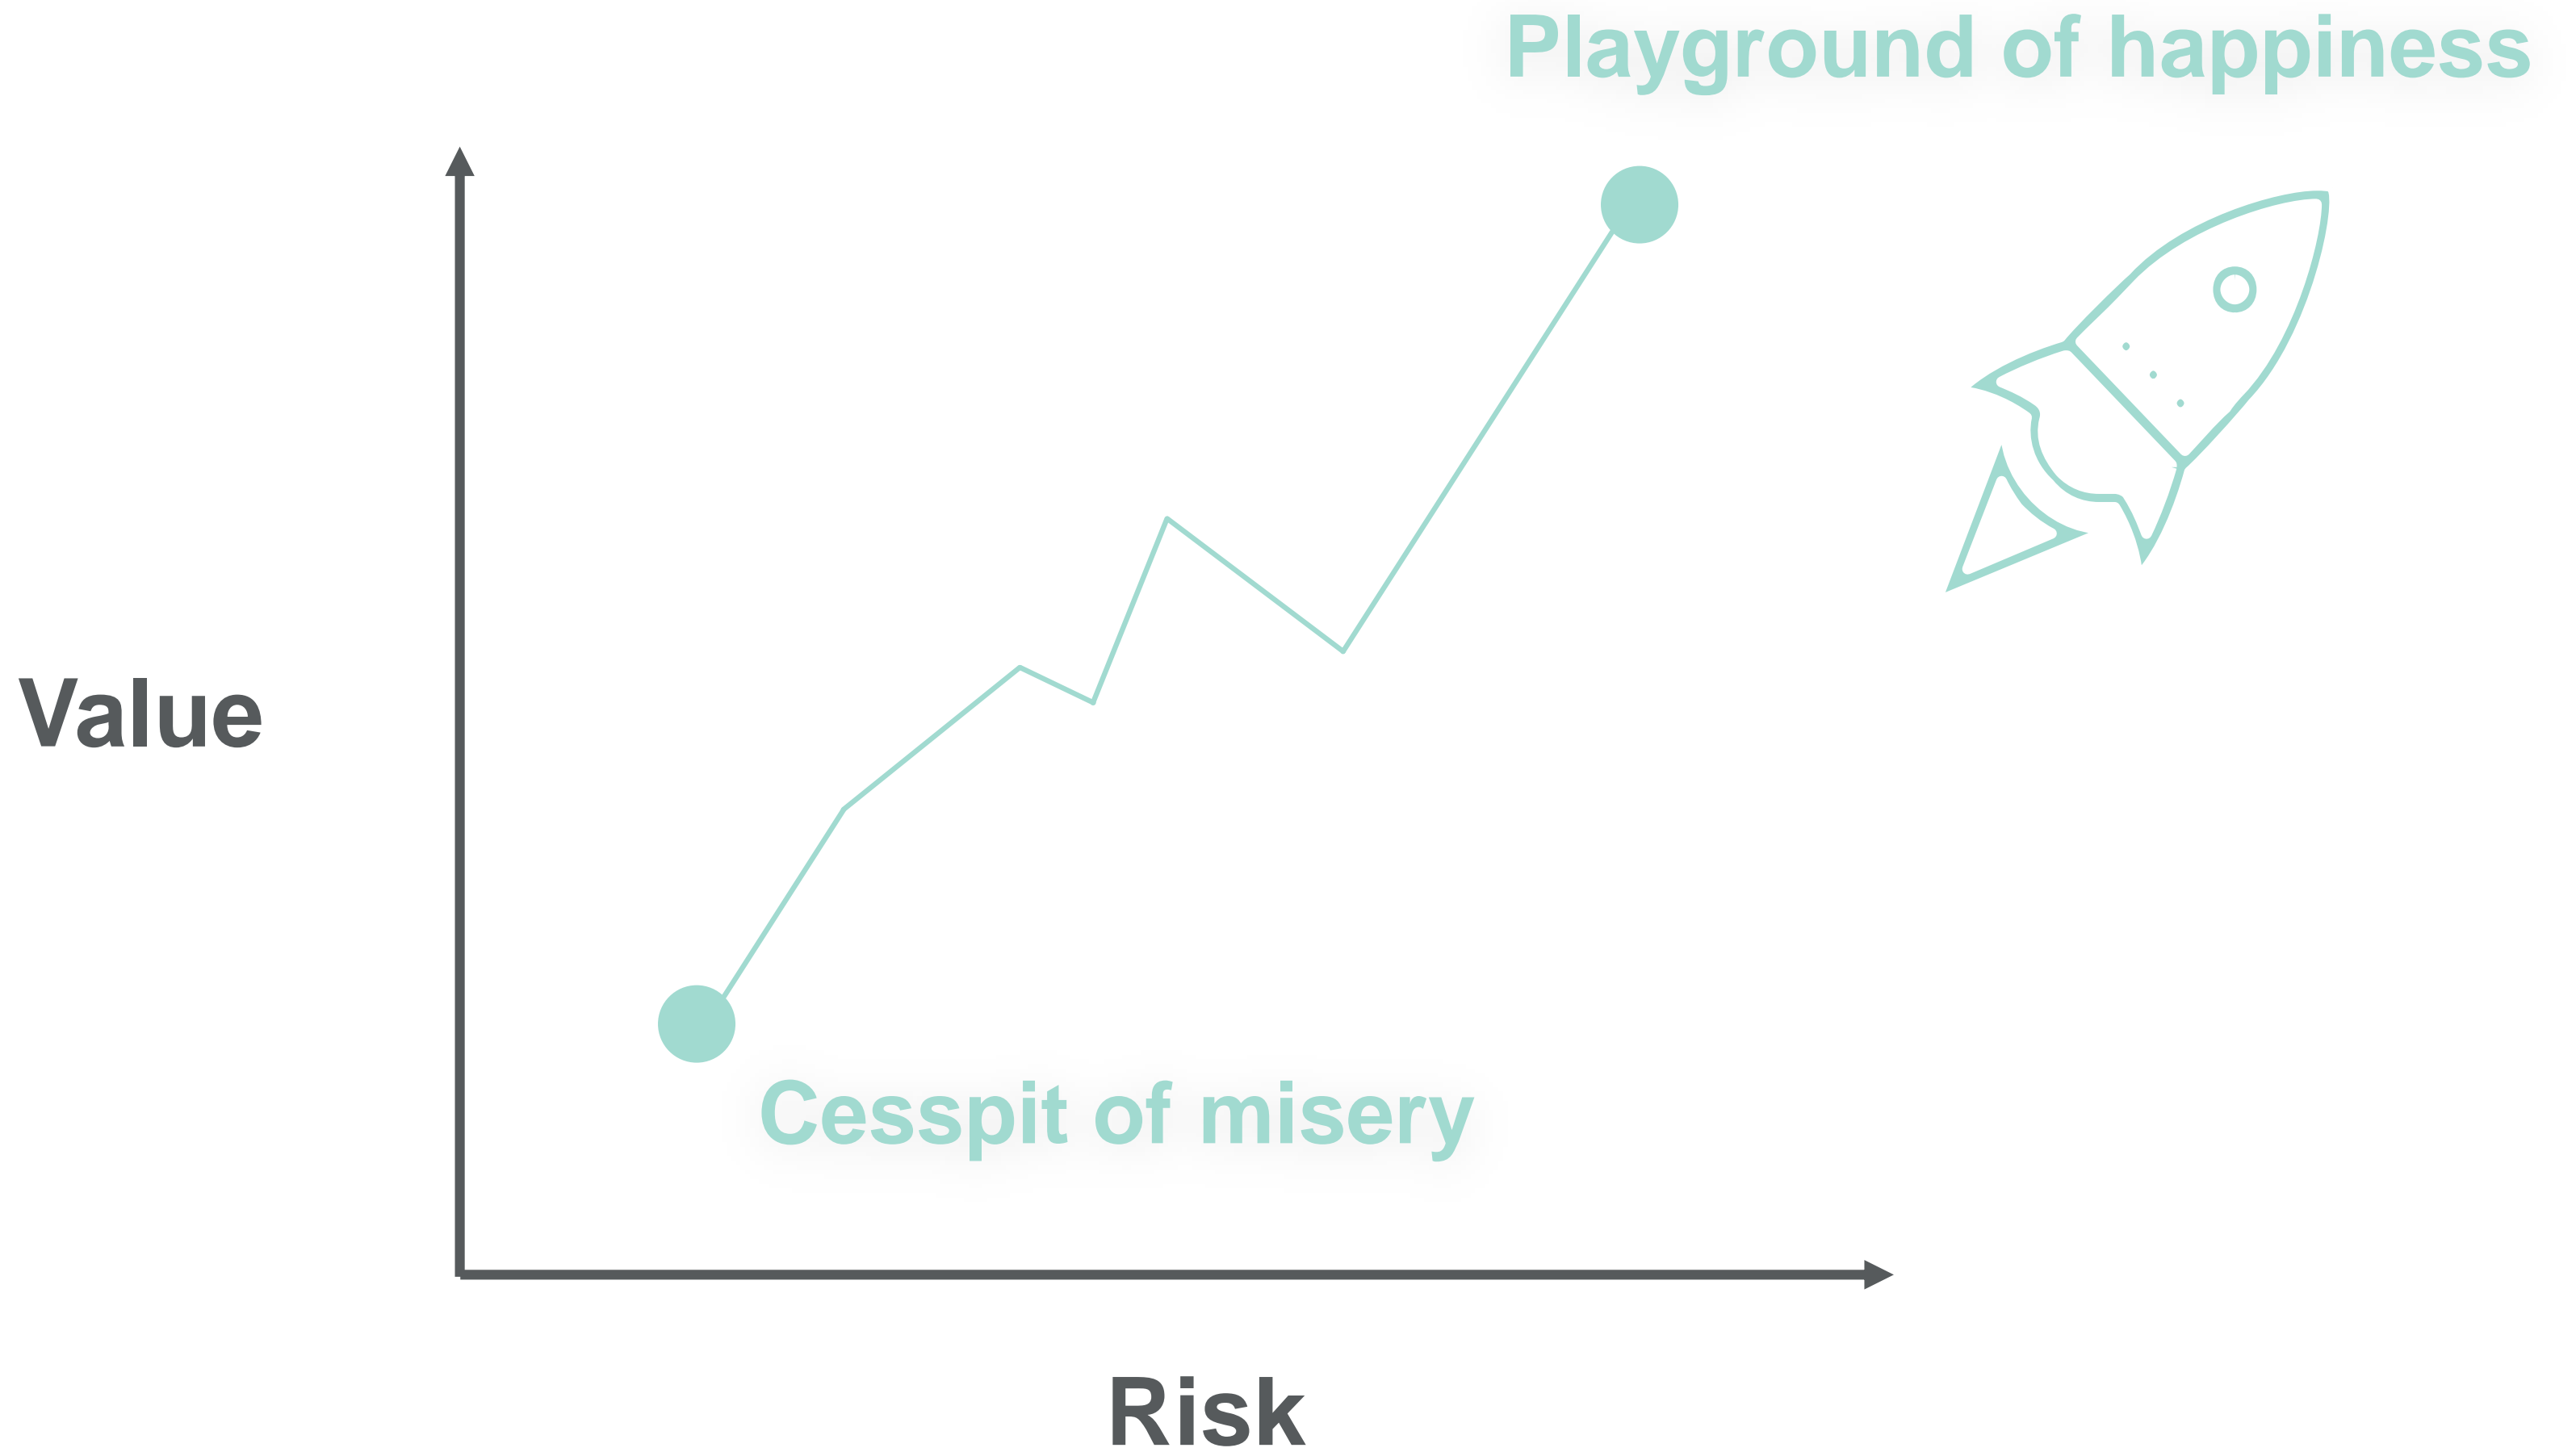

Why should you care?

The right kind of activities/work

So, how do you get started?

What do you want to change?

1. Directly align work to organisational strategy
2. Prioritise “important” work
3. Spend more time creating value & less time protecting it
4. Perform it efficiently and effectively
5. Empower clients to take predictable, sophisticated risks

Three buckets of solutions

Quick wins ... what you can get started on now

- Be ruthless about meetings
- Email management
- Notifications
- To do list in calendar
- Two screens
- Know top 10-20 keyboard shortcuts

02

Legal Operations and Continuous Improvement

Can an in-house legal team be like a Formula 1 pit crew?

The main goal

to identify factors that can lead our company and industry back to the position that should have been held and to ensure that we do not see the return of the other conditions, and to set the priorities, resources, and our account of how to do it.

It is not a process involving stakeholders either. There's no one more important than ourselves in this matter, and we are responsible for working with the best of our clients to set the direction for others.

Leadership, Authority, Credibility

able to drive such change from within the best decisions working in the best interests of business stakeholders. The number of resources that can be used in the company's strategy.

Addressing change is a complex process, and it is not a linear, sequential, and step-by-step thing, and it is not a linear process.

Leadership: the quality of one's ability to set a vision for the future and to inspire others to follow it.

Authority: the power or right to give orders, make decisions, and enforce obedience.

Qualifications

- Having a good understanding of the business, the industry, and the market.
- Being able to identify and solve problems, and to make decisions and take action.
- Having a good understanding of the business, the industry, and the market.
- Having a good understanding of the business, the industry, and the market.
- Having a good understanding of the business, the industry, and the market.
- Having a good understanding of the business, the industry, and the market.

Objectives

- To ensure that the company is able to meet the needs of its clients.
- To ensure that the company is able to meet the needs of its clients.
- To ensure that the company is able to meet the needs of its clients.
- To ensure that the company is able to meet the needs of its clients.
- To ensure that the company is able to meet the needs of its clients.
- To ensure that the company is able to meet the needs of its clients.

Results

What did you observe?

- Our F1 car is info.
- They have a very clear goal. The driver (our client) is in need. They've got very clear expectations – outcomes.
- Speed is critical.
- Precision. Everyone knows their role, there's no overlap, no duplication, no fuss.
- More people but they're doing different jobs. Not all about cost cutting.
- All the tech relies on people.
- No clutter, no noise, no distractions.
- In 1950s, crew cleaned the windscreen but the driver looked over it.
- Stacks of info to make the right decisions.

In-house only firm to help bolster legal operations education

CORPORATE COUNSEL | 13 NOVEMBER 2018

By: Grace Ormsby

— 1 minute read

0 SHARES 0 COMMENTS

A firm that hires in-house lawyers exclusively has signed a partnership agreement that will clarify understanding of legal operations.

Lexvoco has announced a new partnership with the Association of Corporate Counsel Australia (ACC), as the organisation’s official legal operations partner.

As an in-house-only firm, lexvoco hopes to use the partnership as a platform “to educate the industry”, and minimise instances where clients are “being drawn down a rabbit hole to buy a tech product because it’s got ‘legal operations’ attached to its name or tagline.”

It also has plans to educate ACC members “that you don’t need a big tech budget to improve your legal operations.”

CEO of lexvoco Anthony Wright said the partnership “cements our position as the industry leader in legal operations and supports our purpose to help in-house lawyers in Australasia succeed.”

For the firm’s head of legal operations, Jason Ryan, the partnership offers an opportunity to improve understanding around legal operations and negate “legal operations” from being used as “a buzz phrase that is getting thrown around left, right and centre, particularly by legal tech providers.”

“The whole premise of legal operations is problem led,” Mr Ryan said, “to discover the root causes of inefficiencies and

How can legal tech help?

5 guiding principles for selecting Legal Tech

1. Your starting point should not be a legal tech vendor – they will try to sell you a solution to a problem that you may not have
2. Decide which “category” of legal tech you should prioritise
3. Consider the systems you already have
4. Capture the data you need to be able to compare current vs future state and report on your success
5. Be prepared to run a pilot or develop a proof of concept – a short term pivot will save you in the long term

Sequence to start fixing something
