

Dr Madeleine de Hauke  
ACC On-line list of Coaches  
May 2020

A medical doctor with 20+ years in the chemical and medical industries across three continents: in normal times Dr Madeleine de Hauke is recognized for her work as a Meetings Doctor and Midlife Professional Coach. She advises, coaches and trains large corporations, SMEs and NGOs on re-programming their meeting culture to increase results (including your meetings with *yourself*: when's the last time you got in your own way?)

But these are not normal times. Through the pandemic Madeleine works with individuals and organisations to optimise their Reset and Recovery efforts. Specifically, she supports clients with:

- **Transitioning mid-life professional challenges**, identifying and pursuing goals, turning setbacks into opportunities
- **Maintaining a growth mindset to lead effectively** through uncertainty and volatility (including pulling lessons from the pandemic experience to improve response and optimize future remote work scenarios)
- **Leading effective & productive remote teams & virtual meetings** that are engaging, team-building and results-driven
- **Real-time support for having tough conversations** while maintaining morale/focus of the team
- **Self-mastery to be empathetic and supportive whilst driving team productivity**, without slipping into exhaustion/emotional overload
